

Rockland Fire Equipment offers a complete line of state of the art emergency protective equipment for defense against terrorist attacks, including bio-chemical protective kits for survival and evacuation. Our protective equipment meets the exacting standards of all First Responders.

The FIRST RESPONDER BIO-CHEMICAL PROTECTIVE KIT has been developed to provide individuals with easy-to-use, critical protection for a safe exit from an area or building where life threatening chemical, biological or radiological (CBR) warfare agents have been introduced.

The FIRST RESPONDER BIO-CHEMICAL PROTECTIVE KIT includes a one-piece CBR Evacuation suit with attached gloves, hood and boots (no taping required), Millennium CBRN Gas Mask, police/dog whistle, potassium iodide pills, emergency light - all in a high visibility kit bag.

The FIRST RESPONDER BIO-CHEMICAL PROTECTIVE KIT is designed for deployment in fire departments, law enforcement vehicles, military, medical vehicles, hospitals, and all city and state agencies. This kit was initially designed for the City of New York after September 11th.

“In an emergency, your life may depend on having the best survival equipment available.”

FIRST RESPONDER BIO-CHEMICAL PROTECTIVE KIT contents:

- **Kit (fanny pack or duffle bag)** High-visibility with color-coded size tag for quick identification

- **CBR Evacuation Suit**

It is critical that protective ensembles worn by all responders including local, state and military personnel be certified as compliant with NFPA 1994 (2007 Edition) Class 3 standards.

The CBR Evacuation suit is the first and only of its kind to be certified to the NFPA 1994 (2007 Edition) Class 3 standards. It is designed to be worn with a specific NIOSH CBRN approved APR mask (see next page) and specific certified NFPA boots.

New NFPA breathability requirements were designed to provide longer wear with less stress on the user without compromising performance. Unlike 2001 Edition garments, carbon dioxide (CO₂) build-up is impossible thanks to the attached visor design with front opening which allows the wearer to breathe clean oxygen. Vapor-tight ensemble had 0% vapor penetration on NFPA 1994 Man-In-Simulant Test (MIST) The suit is one-piece which eliminates the requirement for taping of gloves or boots, and can be donned in seconds.

Sizes: XS, SM, MED, LG, XL, 2XL, 3XL, 4XL

- **Hazmat Overboot** Hazmat protection designed for easy donning and doffing while wearing the CBR Evacuation Suit. NFPA 1991 edition compliant.

“When escaping from chemical, biological and radiological agents, every second counts.”

FIRST RESPONDER BIO-CHEMICAL PROTECTIVE KIT contents (continued):

- **Millennium CBRN Gas Mask**

The Millennium CBRN Gas Mask meets or exceeds all performance requirements of the new NIOSH CBRN Standard by effectively removing harmful gases, vapors and particulates so that the wearer can confidently breathe safely. The Millennium CBRN canister contains chemical sorbents and a P100 filter to attract, retain, and neutralize contaminants. The mask is lightweight, provides a tight seal on the face, and a nose cup helps to reduce fogging of the face piece. The wearer has a wide field of view, can communicate easily while wearing the mask.

- **Peel-& Stick Kneepads (1 pair)**

- **Potassium Iodide Pills (package of 14)**

- **Cotton Gloves (1 pair)**

- **Water Canteen (16 oz. collapsible)**

- **Instruction Manual**

- **Color-coded Size Tag**

- **Confined Space Survival Accessories:**

- Police whistle
- Dog whistle

- Mini-light, high-intensity with long-lasting lithium batteries (5 hour constant burn time)

- Light sticks, 12-hour, self-illuminating (10 per kit)

- Lanyard with clip (for whistles and mini-light)

Please call for more information or visit our website. It would be Rockland Fire's privilege to provide you with the emergency protective equipment required for today's first responders.
